GPS Stochastic Modelling: Signal Quality Measures and ARMA Processes (Springer Theses)

Xiaoguang Luo

Global Navigation Satellite Systems (GNSS), such as GPS, have become an efficient, reliable and standard tool for a wide range of applications. However, when processing GNSS data, the stochastic model characterising the precision of observations and the correlations between them is usually simplified and incomplete, leading to overly optimistic accuracy estimates.

This work extends the stochastic model using signal-to-noise ratio (SNR) measurements and time series analysis of observation residuals. The proposed SNR-based observation weighting model significantly improves the results of GPS data analysis, while the temporal correlation of GPS observation noise can be efficiently described by means of autoregressive moving average (ARMA) processes. Furthermore, this work includes an up-to-date overview of the GNSS error effects and a comprehensive description of various mathematical methods.

From reader reviews:

Johnny Cervantes:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to find out everything in the world. Each book has different aim or perhaps goal; it means that book has different type. Some people really feel enjoy to spend their the perfect time to read a book. They are really reading whatever they take because their hobby is actually reading a book. What about the person who don't like reading a book? Sometime, particular person feel need book whenever they found difficult problem or perhaps exercise. Well, probably you will want this GPS Stochastic Modelling: Signal Quality Measures and ARMA Processes (Springer Theses).

Richard Stratton:

As people who live in the actual modest era should be revise about what going on or data even knowledge to make these individuals keep up with the era that is always change and make progress. Some of you maybe can update themselves by reading books. It is a good choice for you personally but the problems coming to you is you don't know which you should start with. This GPS Stochastic Modelling: Signal Quality Measures and ARMA Processes (Springer Theses) is our recommendation to make you keep up with the world. Why, because this book serves what you want and need in this era.

David Carter:

Do you one of people who can't read gratifying if the sentence chained inside the straightway, hold on guys this specific aren't like that. This GPS Stochastic Modelling: Signal Quality Measures and ARMA Processes (Springer Theses) book is readable by means of you who hate those perfect word style. You will find the data here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to supply to you. The writer connected with GPS Stochastic Modelling: Signal Quality Measures and ARMA Processes (Springer Theses) content conveys objective easily to understand by most people. The printed and e-book are not different in the information but it just different by means of it. So , do you still thinking GPS Stochastic Modelling: Signal Quality Measures and ARMA Processes (Springer Theses) is not loveable to be your top record reading book?

Tammy Carver:

Beside this specific GPS Stochastic Modelling: Signal Quality Measures and ARMA Processes (Springer Theses) in your phone, it could possibly give you a way to get nearer to the new knowledge or data. The information and the knowledge you may got here is fresh in the oven so don't possibly be worry if you feel like an older people live in narrow town. It is good thing to have GPS Stochastic Modelling: Signal Quality Measures and ARMA Processes (Springer Theses) because this book offers for your requirements readable information. Do you oftentimes have book but you seldom get what it's about. Oh come on, that will not happen if you have this with your hand. The Enjoyable arrangement here cannot be questionable, such as

treasuring beautiful island. Techniques you still want to miss it? Find this book and also read it from at this point!
