Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series)

Geoffrey A. Lawrance

Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) Geoffrey A. Lawrance

At the heart of coordination chemistry lies the coordinate bond, in its simplest sense arising from donation of a pair of electrons from a donor atom to an empty orbital on a central metalloid or metal. Metals overwhelmingly exist as their cations, but these are rarely met 'naked' – they are clothed in an array of other atoms, molecules or ions that involve coordinate covalent bonds (hence the name coordination compounds). These metal ion complexes are ubiquitous in nature, and are central to an array of natural and synthetic reactions.

Written in a highly readable, descriptive and accessible style *Introduction to Coordination Chemistry* describes properties of coordination compounds such as colour, magnetism and reactivity as well as the logic in their assembly and nomenclature. It is illustrated with many examples of the importance of coordination chemistry in real life, and includes extensive references and a bibliography.

Introduction to Coordination Chemistry is a comprehensive and insightful discussion of one of the primary fields of study in Inorganic Chemistry for both undergraduate and non-specialist readers.

From reader reviews:

Allison Stiffler:

Information is provisions for those to get better life, information these days can get by anyone from everywhere. The information can be a know-how or any news even a concern. What people must be consider any time those information which is inside the former life are challenging to be find than now could be taking seriously which one would work to believe or which one the actual resource are convinced. If you obtain the unstable resource then you buy it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) as the daily resource information.

James Peterson:

People live in this new day of lifestyle always make an effort to and must have the spare time or they will get great deal of stress from both everyday life and work. So , when we ask do people have free time, we will say absolutely without a doubt. People is human not a robot. Then we request again, what kind of activity are you experiencing when the spare time coming to you of course your answer will unlimited right. Then do you try this one, reading ebooks. It can be your alternative inside spending your spare time, typically the book you have read will be Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series).

Dolores Crook:

As a college student exactly feel bored for you to reading. If their teacher expected them to go to the library as well as to make summary for some e-book, they are complained. Just tiny students that has reading's heart or real their hobby. They just do what the educator want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that examining is not important, boring along with can't see colorful photos on there. Yeah, it is being complicated. Book is very important for you. As we know that on this age, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) can make you really feel more interested to read.

Jeanie Clark:

Reading a e-book make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is prepared or printed or outlined from each source that will filled update of news. With this modern era like currently, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just trying to find the Introduction to Coordination Chemistry (Inorganic Chemistry: A Textbook Series) when you desired it?
