## On-line LC-NMR and Related Techniques

This book gives a comprehensive overview of the basis and the current applications of LC-NMR and related techniques. It deals with the practical aspects of the hardware and software set-up for a successful performance of on-line coupling experiments. It covers the solution of real-world problems from the fields of biomedical, pharmaceutical and environmental studies as well as the analysis of natural products and polymeric compounds. Thus guidelines for an efficient application of the powerful hyphenated technique LC-NMR in combination with LC-MS are presented. Besides LC-NMR, important techniques such as the on-line coupling of gel permeation chromatography and supercritical fluid chromatography, together with  $^1\text{H}$  NMR spectroscopy, are described in detail.

Fascinating further aspects, such as the application of capillary separation techniques either in the single or parallel detection mode, together with the possibilities of direct  $^{13}\text{C}$  monitoring of chromatographic events, are also discussed.

Key features include:

- \* Up-to-date information on the theoretical and experimental methodology
- \* Coverage of applications in biomedical, pharmaceutical and natural product analysis, as well as environmental polymer and related hyphenated techniques
- \* Information appropriate for researchers in organic, pharmaceutical and medical chemistry

Overall, this book is a requirement for all researchers and staff members dealing with structure elucidation problems in separation science.

### From reader reviews:

#### **Douglas Gibson:**

Book will be written, printed, or illustrated for everything. You can learn everything you want by a reserve. Book has a different type. As it is known to us that book is important matter to bring us around the world. Next to that you can your reading ability was fluently. A e-book On-line LC-NMR and Related Techniques will make you to end up being smarter. You can feel far more confidence if you can know about almost everything. But some of you think that will open or reading some sort of book make you bored. It isn't make you fun. Why they are often thought like that? Have you in search of best book or ideal book with you?

#### **Donald Perkins:**

Reading a e-book can be one of a lot of action that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people enjoyed. First reading a reserve will give you a lot of new data. When you read a guide you will get new information due to the fact book is one of several ways to share the information or maybe their idea. Second, studying a book will make an individual more imaginative. When you examining a book especially hype book the author will bring someone to imagine the story how the personas do it anything. Third, you can share your knowledge to other individuals. When you read this On-line LC-NMR and Related Techniques, you can tells your family, friends in addition to soon about yours guide. Your knowledge can inspire others, make them reading a guide.

#### **William Matthews:**

People live in this new morning of lifestyle always make an effort to and must have the spare time or they will get lot of stress from both everyday life and work. So , when we ask do people have free time, we will say absolutely without a doubt. People is human not only a robot. Then we request again, what kind of activity have you got when the spare time coming to you of course your answer will unlimited right. Then do you ever try this one, reading guides. It can be your alternative inside spending your spare time, the particular book you have read is actually On-line LC-NMR and Related Techniques.

#### **Awilda Kell:**

What is your hobby? Have you heard which question when you got learners? We believe that that problem was given by teacher to the students. Many kinds of hobby, All people has different hobby. So you know that little person similar to reading or as examining become their hobby. You have to know that reading is very important along with book as to be the issue. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You find good news or update regarding something by book. Different categories of books that can you choose to adopt be your object. One of them are these claims On-line LC-NMR and Related Techniques.
