Mathematical Problems in Image Processing (Applied Mathematical Sciences) Gilles Aubert

Partial differential equations (PDEs) and variational methods were introduced into image processing about fifteen years ago. Since then, intensive research has been carried out. The goals of this book are to present a variety of image analysis applications, the precise mathematics involved and how to discretize them. Thus, this book is intended for two audiences. The first is the mathematical community by showing the contribution of mathematics to this domain. It is also the occasion to highlight some unsolved theoretical questions. The second is the computer vision community by presenting a clear, self-contained and global overview of the mathematics involved in image processing problems. This work will serve as a useful source of reference and inspiration for fellow researchers in Applied Mathematics and Computer Vision, as well as being a basis for advanced courses within these fields. During the four years since the publication of the first edition, there has been substantial progress in the range of image processing applications covered by the PDE framework. The main goals of the second edition are to update the first edition by giving a coherent account of some of the recent challenging applications, and to update the existing material. In addition, this book provides the reader with the opportunity to make his own simulations with a minimal effort. To this end, programming tools are made available, which will allow the reader to implement and test easily some classical approaches.

From reader reviews:

Jamie Brewer:

What do you consider book? It is just for students because they are still students or it for all people in the world, what the best subject for that? Just simply you can be answered for that issue above. Every person has various personality and hobby for each and every other. Don't to be compelled someone or something that they don't wish do that. You must know how great along with important the book Mathematical Problems in Image Processing (Applied Mathematical Sciences). All type of book would you see on many sources. You can look for the internet sources or other social media.

Joshua McIntosh:

Here thing why that Mathematical Problems in Image Processing (Applied Mathematical Sciences) are different and trustworthy to be yours. First of all reading a book is good nonetheless it depends in the content than it which is the content is as delightful as food or not. Mathematical Problems in Image Processing (Applied Mathematical Sciences) giving you information deeper including different ways, you can find any e-book out there but there is no book that similar with Mathematical Problems in Image Processing (Applied Mathematical Sciences). It gives you thrill looking at journey, its open up your own personal eyes about the thing this happened in the world which is perhaps can be happened around you. You can actually bring everywhere like in park, café, or even in your way home by train. In case you are having difficulties in bringing the branded book maybe the form of Mathematical Problems in Image Processing (Applied Mathematical Sciences) in e-book can be your choice.

Christopher Hendrick:

It is possible to spend your free time to study this book this publication. This Mathematical Problems in Image Processing (Applied Mathematical Sciences) is simple to bring you can read it in the playground, in the beach, train in addition to soon. If you did not have much space to bring often the printed book, you can buy the e-book. It is make you simpler to read it. You can save the particular book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Drew Dube:

You will get this Mathematical Problems in Image Processing (Applied Mathematical Sciences) by check out the bookstore or Mall. Just simply viewing or reviewing it might to be your solve challenge if you get difficulties for the knowledge. Kinds of this book are various. Not only by simply written or printed but additionally can you enjoy this book by simply e-book. In the modern era like now, you just looking by your local mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose right ways for you.
